# GOVERNOR KENNEDY AND THE

The Committee appointed by the City Council to wait upon Governor Kennedy in reference to the employment of the chaingang on the public streets had an interview with His Excellency vesterday. The Governor was unwilling that the prisoners' labor should be directed in such a channel, and gave his reasons succinctly enough to the deputation. In examining the circumstances of the case we cannot, we must confess, subscribe in the main to the views propounded by His Excellency. The present position of the City Council is one which makes any attempt at sunitary regulation almost futile, and it is, therefore, but right that the only power which can aid it in its extremity should strain a point, even if it were necessary, to accomplish so desirable a result. The municipal authorities have got no money, are destitute of the power of raising municipal revenue, and are consequently obliged to come to the Executive for assist ance. That such a state of affairs should exist in any British community is almost incredible. We do not always agree with the observations which His Excellency is pleased occasionally to make about the House of Assembly, but we cannot find fault with his remarks to the deputation vesterday, in reference to the action of the members on the Incorporation bill. To those who voted for killing the measure the present unsatisfactory condition of things is entirely due. Had either one or other of the Incorporation bills, which came before the House during the present session, become law, we should not have had at the present time the pitiable spectacle of a mu-

nicipal deputation calling upon the Governor

for assistance to clean the streets, and for

advice as to the extent of the City Council's

To come, however, to the deputation. His Excellency objected to having the chain-gang employed on the streets, on the ground first, that it would, by making the prisoners' de gradation so public, materially interfere with all future efforts of reformation, and in the second place that it would tend to diminish the respectability of the police force. The first reason is one that is always brought forward on the attempt to employ convict labor on public thoroughfares, and has, we admit under ordinary circumstances, a certain amount of weight. But our circumstances are not ordinary; we already employ the chain-gang on public works, and marchithem daily through the public streets. If they are not occupied in cleansing the most busy thoroughfares they are engaged in labors that make them almost equally public, without a tithe of that general utility which would result from their efforts to improve the sanitary condition of the city. The time and labor consumed in picking and wheeling dirt about the Government buildings might almost have made a second Sebastopol. As it is, the work has been in the present state of affairs, when it is so badly required elsewhere, almost thrown away. So far as this part of the ar gument goes, we do not think there would be any injury to either the town or the prisoners by the employment of the chain-gang on the streets. The great fault, so far as the reclamation of prisoners is concerned, is not so much making them work in public, as it is putting the criminals indiscriminately together in the chain-gang. It is only the worst and most incorrigible prisoners that should be placed in this description of pillory, and to this class any little addition of publicity

will make a very imperceptible difference in That the police force which His Excellency states is now thoroughly remodelled. would become demoralized or decrease in respectability by being placed in supervision of the prisoners on the streets of the city, is, we think, a mistake. There is nothing more disreputable in watching the convicts on Government street than there is in watching them across James Bay. As for the occupa pation, some one must do the scavenger's work, and some one must supervise it, and we really cannot see why a policeman's nasal organs or refined sensibilities should be any more protected than the employes or officers of the City Council. We certainly cannot perceive in what manner the morale of the force would be affected. His Excellency desires to have the police establishment a respectable one, and we are sure he has in this respect the support of the inhabitants; but if the respectability of any branch of the public service is to diminish in proportion to its usefulness, we shall have, we are afraid. to change the standard of the respectability. The public are obliged to pay for both the chain-gang and the police, and in this happy period when crime is reduced to a minimum, when the services of the force are not so frequently called into requisition as formerly, it is surely as little as can be expected that its members should be as much as possible utilized. There is no danger of any demoralization resulting from such a course; it is not the occupation of the police that is ever likely to diminish its respectability, but rather in-efficient pay. Give the members of the force a respectable compensation for their services and we feel bound to say it matters little to them whether they are supervising the clearing away the immundicity which so disagreeably affects our streets, or the ground around the colonial office. At all events the streets require to be cleaused, the putrid matter which offends our nostrils demands an imme diate removal, and in the moneyless condition of the Council we think it is as little as can be expected that the labors of those who have outraged our moral atmosphere should be deve vi to the amelioration of our physical

TO THE EDITION OF THE BRITISM COLONIST,—
SIR: I am surprised that certain parties on Johnson street should have complained in the Police Court, and that the newspapers should also have stated that I am selling liquor without a license, where the property of the everyone. Or have either evithem ever paid one cent (towards rospecting the country? Whereas I can show that I have paid \$8,000 or \$9,000 towards prospecting Fraser River, Stekin and Caribo, besides for copper and coal mines, and an always contributing my quota towards any institution whenever called upon. I would turther enquire whether sither of the parties keep a more respectable establishment than I do? After all this the said parties seek to make me confine my business to a space of about 20 or 25 feet; and why? Because one of them has expended about 75 for papering his establishment, and the other \$33 for a counter. If either of the parties now apposing me are so jealous of my business. I will pell out to them for fifty cents upon the dollar.

P. MANETTA. P. MANETTA. Victoria, V. I., July 3d, 1865. ju3 1w

A CARD. TO THE EDITOR OF THE PRITISH COLONIST .-

Sri,—My attention being called to a "Card" in this morning's Colonist regarding the license question in Johnson street, and signed "P. Manetta," I deem it proper to answer it, presuming that I am the person referred to as employed by him, and more particularly as I am fully acquainted with the facts of the case.

There are always two sides to a story. In the first place, Mr. Manetta states that he has had granted him no less than three retail liquor licenses, one for Yates street, one for Johnson street, and one for Sooke. I will take this for granted, but I would ask Mr. Manetta in return if the Magistrates, when they so liberally granted him the Johnson-street lincense, as is usually done, to defined premises. When the Johnson street clinense, as is usually done, to defined premises. When the Johnson street clinense was granted, it was for the House standing on the corner of Orientai Alley and Johnson street, and which had no connection whatever with the premises sought to be used as asloon next door to me. If Mr. Manetta would continue to keep the public business in the house at the corner, I should be satisfied. But what does he do? He sells out by public auction, and lets the premises at the corner for a clothing store, and then commences to sell liquor in a shanty in Oriental Alley, under the same license. To this also the victualiers in Johnson street would not object; but Mr. Manetta not being yet satisfied, makes another more, viz, to shandon this shanty and come again into Johnson street, and then commences nev to mine, and against which I do protest, as being illegal, and likely to deprive me unfairly of a fair share of businese.

Mr. Manetta says "they are trying to get signatures to a petition, etc." In reply I would

against which I do protest, as being illegal, and likely to deprive me unfairly of a fair share of businese.

Mr. Manetta says "they are trying to get signatures to a petition, etc." In reply I would state that we have not only tried, but have obtained the signatures of all the parties we called on, with two exceptions; one of whom objected on the ground that he was a particular friend of Manetta's, and would not sign against him, but acknowledged the fairness of our complaint. He further asserts that on leaving his employ I opened a saloon next door to him, and that he oftered me no opposition.—This is incorrect, for I did not open a saloon, but bought out an old established business, and which I contend I had a perfect right to do, and that he had no power to oppose me. One word further: does Mr. Manetta think that because he has laid out a large sum of money in Victoria that such outlay justifies him in a monopoly which reason would condemn and law prohibit? I maintain, however, that although I may not be as self-important a citizen as Mr. Manetta, yet that I am equally as good an one, and but for his injudicious rushing into print, should have calmly waited the decision of the Bench, whom I am assured will, regardless of Mr. Manetta, "dollars weight," impartially decide the subject before them.

CRAIGPLOWER SCHOOL-We are sorry to learn that this institution has been of late suffering from the most wretched mismanage. ment. The new Superintendent of Education, Mr. Waddington, has, we understand, recently paid the school an official visit, and it is rumored found the system of teaching most inefficient, and the backwardness of the pupils most pitiable, exhibiting the grossest negligence on the part of the managers. A new teacher has just been appointed, but having been only a few wocks in office, he has not as yet had sufficient time to effect the requisite improvements. It is plainly ovident that the state of the public schools of the colony requires the most thoughtful and enlightened consideration of the Board of Education. It is deplorable to think that the hildren of this commanity should so long have suffered through the incompetence and neglegence of teachers, and one of the first and most obvious duties of the Board should be to establish a proper standard of qualification as to the ability and character of public school teachers. the pupils most pitiable, exhibiting the

Every thoughtful American must have been forcibly impressed with the fiberality of Englishmen in not only heartily participating with their foreign citizens in perty qualification; there the fell spirit of the source of the late civil war was the account of the principle of manhood knowledgment of the formed in column and marched to their respective churches, where they were disminsed to their the specific value of the formed in column and marched to their formed in column and marched to their formed in column and marched t participating with their foreign citizens in commemerating a day not inscribed on the National Calendar, but quietly giving ear and suffering to be read aloud on their own soil a declaration office regarded as high treason, and which had caused the blood of their ancestors to be freely shed. We may here remark par parenthese that however applicable this document might have been in days gone by its force is now entirely expended, and the protestations it contains are rendered nugatory by the changes wrought by the hand of time, Viewing the friendly feeling now existing between the two nations we question too the desirability of keeping up a custom that should have long since been allowed to fall into discustude. What has been the cause of this great and wonderful progress? why had they without the experience of ages in legislation been enabled to distance the most advanced of European communities in the race of political life! Their vast scope of country, its prollios soil and all varieties of climate, doubtless have had their influence; but the great latitude allowed for individual action, the new fields for energy to display itself, the Lope and certainty of advancement for the ambitious in political as well as in every other walk of life; and, beyond all, the great truth acknowledged by them as a nation, that all men politically were equal; these were the moving springs of their action; these were some of the influences which had in so short a period of time, transformed thom from a mere hand-of time, transformed thom from a mere band-of time transformed them from a mere band-of time transformed to the mender and pleasure at the brighten had been collected. made their voice heard, and instead of the wealthy few controlling all things political, they would have been compelled to acknowledge the power of the majority. And so it was in all those States where manhood suffrago was least understood and not at all recognised as a true principle. In that part of the country the enemies of the Government were the most defiant and uncompromising. In the Northern tier of Slave States the principle was put in practice, yet but imperfectly on Vancouver Island than Tuesday last, and at an early hour it was evident that every many woman and child who could by any manner or means escape beyond the city limits intended to do so. By noon every place of business, public and private, was closed, and the whole city was astir holiday making. Groups were seen wending their way in different directions.

Victoria Arm had its patrons. The lakes had theirs; in fact not a boat, not a horse nor a vehicle of any description but was constrained to bear its quota of pleasure seekers. On Fort street the clouds of dust showed that the grand ple-uie at Cadboro Bay was destined to receive the lion's share of public patronage. Williams' leviathan "buss" "Young America" and every omibus in town was kept flying without intermission to this romantic retreat, and at two o'clock a vast concourse of potsons was assembled on the grounds. At this hour the Hon. Allen Francis, U. S. Consul, mounted the musician's gallery, creeted at the side of the handsomely decorated dancing platform, and in a clear voice read the Declaration of Independence, the audience uncovering their heads. At its ciple was put in practice, yet but imperfectly understood, and there the people were dis zans, professional men, men of commerce and navigation, bankers, manufacturers, and farmers; in the South the great bulk of the people were engaged in ootton growing or such staples as required the aid of negro labor, as well as breeding negroes for the market. In the North the interests of the people were so diverse and conflicting that no chain of circumstances could unite them in a political combination for bad purposes. In the South the main interests of their section being identical the whole population were made to feel an influence population were made to feel an influence which induced them to attempt to overthrow the government. In the North no one interest the government. In the North no one interest was sufficiently wealthy to control the rest; in the South all the wealth was in the hands of the slave holder. In the North no class of society held an exclusive political power, and so we find vast sums of money expended yearly for public schools; in the South the legislative influence and power were in the hands of a parrow exclusive circle, and while hands of a narrow exclusive circle, and while

we found them enacting laws, terribly severe against the slave, not one dollar is expended for the purpose of establishing matitutions of learning, and thus the poor white man remains in a state of ignorance that enchains him as firmly as legal enactments did the slave. The poorest white man, socially, considered himself the equal of the richest slave holder; and, as a matter of principle, the latter acknowledged it, for to him the only mark of inferiority of race was the color of the skin.

But slavery, the cause of this difference in the

Holloway's Pills and Ointment — Deranged Stomach, Sick Headache.—Our comfort, happiness, and security depend on the knowledge that most diseases originate from apparently attribing beginning, and that the large proportion of them spring from inattention to the state of the atomach. Frofessor Holloway has turned his knowledge to useful account by discovering medicines which cure, without exception, the attendants on disordered digestion. They ward off, likewise, the forturing sick headache. The Ointment should be well rubbed, twice daily, over the stomach, liver and bowels; to them it penetrates, and, added by the Pills, immediately works a revolution as establishes perfect digestion.

volution as establishes pericet digestion.

Healoway's Pills.—Billious affections and stomach complaints, induced by atmospheric heat or too liberal diet, if not early checked, are often attended with serious consequences. When anyone finds his ideas less clear than usual, his eyeight dimmed and his head dizzy, while he is indisposed for all exertion physical or mental, he may be quite sure 'that he is in immediate need of some cooling and purifying imediane. Let ham send at once for a box of Holloway's Pills, after a few doses of which his head will be clear again, his spirits be elevated, and all be energies be restored. Printed directions for the guidance of patients in the use of this admirable medicine are affixed to every box.
